PROFILE

A motivated Computer Science student at Iqra University, with an Undergraduate Software Engineering diploma from NED University of Karachi. Proficient in Python, Java, C, HTML, CSS, and PHP, with a strong passion for software development. Eager to apply my technical skills in development roles, solve real-world problems, and continuously grow in the dynamic IT industry.

WORK EXPERIENCE

Control Technology & Engineering Services JAN 2024 – MAR 2024
International Sourcing Executive | Remote

- Sourced and negotiated quotations for assigned products, ensuring all submissions were completed within deadlines, contributing to a 20% increase in timely order fulfillment.
- Maintained and updated an Excel tracker for product codes, statuses, and due dates, improving record accuracy and reducing errors by 15%.
- Coordinated with suppliers through professional email communication to ensure smooth and efficient quotation requests, status updates, and daily follow-ups.

Cuero London JUN 2024 - AUG 2024
Amazon Product Hunting

- Conducted in-depth market research to identify high-performing and profitable products on Amazon UK, resulting in a 10% increase in product listing quality and sales potential.
- Performed profitability analysis on potential products based on sales performance and supplier pricing, optimizing product selection for maximum margins.

PROJECTS

Product Management System

- Developed a CRUD-based web application with login, logout, and registration using PHP and MySQL.
- Implemented secure authentication and product management (add, view, delete) with proper database handling.
